PRAYING MANTIS ATTACKS CITY!!

EXTRA! EXTRA! READ ALL ABOUT IT!

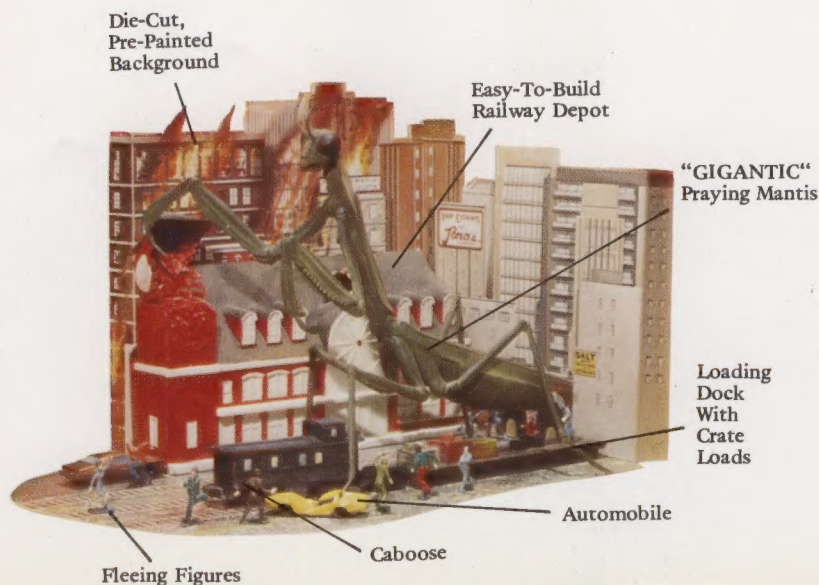

The most exciting kit series ever
is about to invade America.

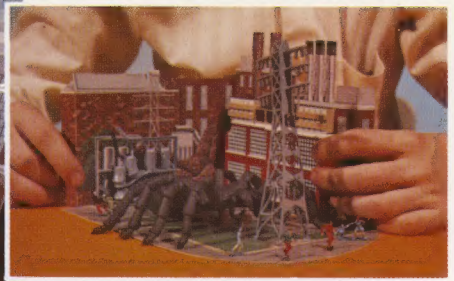

Now . . . MPC is turning loose the Gigantics . . . exactly detailed insects, perfectly proportioned insects . . . but insects that have grown to supernatural sizes, insects on the attack, striking at cities, parks and power stations! And everything is in the kits: the Gigantic insects, the buildings, vehicles, structures and figures

. . . plus a full-color backdrop that completes each science-fiction scene! AND IN ADDITION . . . because the insects are so exact in scale and detail they can be displayed separate from the scenes as science class replicas. It's really two kits in one. And that all adds up to the smash hit series of 1975!

COLOSSAL MANTIS ATTACKS CITY!

Into the railroad yard steps the eye-bulging Praying Mantis, both real and unreal, crunching and crushing everything in it's way. The entire scene is in the kit . . . the huge Praying Mantis, railroad station, loading dock, caboose, car and twenty figures . . . plus the full-color city background scene and base.

HUGE TARANTULA CRUSHES POWER STATION!

The most famous of all spiders . . . the eight-eyed, eight-legged hairy Tarantula. Out goes the lights when this poisonous Gigantic strikes at the city power supplier. Down goes the wire tower and squash goes the long line of transformers, wire towers, vehicles and people. All are carefully detailed to create a life-like scene . . . and enhanced by the full-color background and base.

No. 1-0501

THOUSANDS FLEE FROM RAMPAGING SCORPION!

With its long tail ending with a curved, poisonous sting, this *Centruroides Sculpturatus* is a magnificent model by itself. But it's even more exciting when it whips its tail with unbelievable force against the five-story building while the claw grasps out and snaps a car in half. The Scorpion, buildings, vehicles and people . . . all in the kit along with the city background and base printed in full color.

No. 1-0504

GIGANTIC WASP INVADES PARK!

There is no amusement in the park the day this superbeew shows up. With wings the size of a city block, giant curling antennae reaching out, and spindly legs, this science-fiction creature is true-to-life in every detail. The kit includes parts for the park building, roller coaster structure, vehicles and twenty figures . . . plus the park background and base printed in full color.

TV'S SUPER HERO 6 Million Dollar

TV's prime time super hero, the 6 Million Dollar Man is now available in an exciting new kit series from MPC! Powerful action poses are captured in easy to build models that build into entire scenes. These kits will thrill and delight the 6 Million Dollar Man's millions of fans and they'll be as familiar to adults as to youngsters.

BIONIC BUST OUT

"They don't make dungeons like they used to," says Steve Austin, the 6 Million Dollar Man, as he kicks down the door in a shower of exploding stone.

It's a familiar scene to fans of the amazing astronaut . . . and one they'll want to recreate. Steve's clothed in a colorful NASA flight suit.

Removable panels on the astronaut's bionic arm and leg pop off to show the inner mechanics.

No. 1-0601

Star Man

FIGHT FOR SURVIVAL

Steve's got his hands full in this episode! Full of a surprised ape that thought he'd hassle Steve for a bit. But the 6 Million Dollar Man put his bionic strength to good use here.

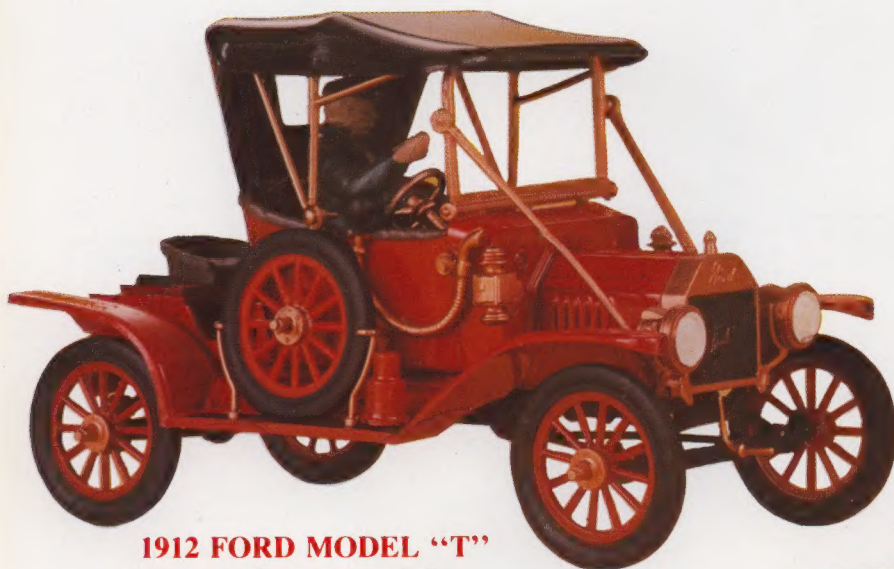

The whole scene is frozen in time in this MPC kit. It's easy to build, easy to paint and Steve's bionic parts are easy to display thanks to removable access panels.

INTERNATIONAL CLASSICS

FAMOUS CLASSICS IN AUTHENTIC 1/32 SCALE

1912 FORD MODEL "T"

The most famous car of all time, and the first to be truly mass produced. Over fifteen million were produced in nineteen years. This kit features a two seat runabout with optional top and folding third seat. Driver figure included.

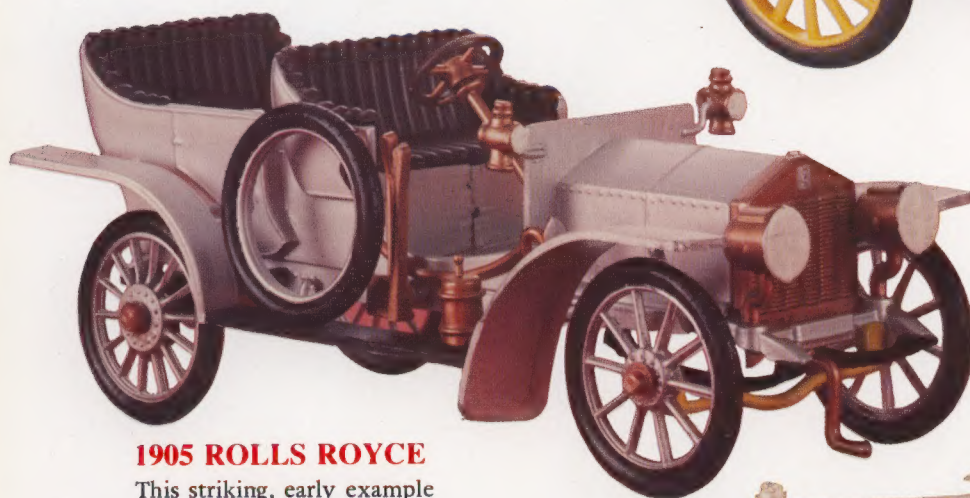

No. 2-1017

1904 DARRACQ

This charming duo-toned twin-seater was one of the finest French autos of its day. The MPC kit neatly captures its handsome lines and detailing in authentic 1/32 scale. The spoked wheels roll, two spare tires are included.

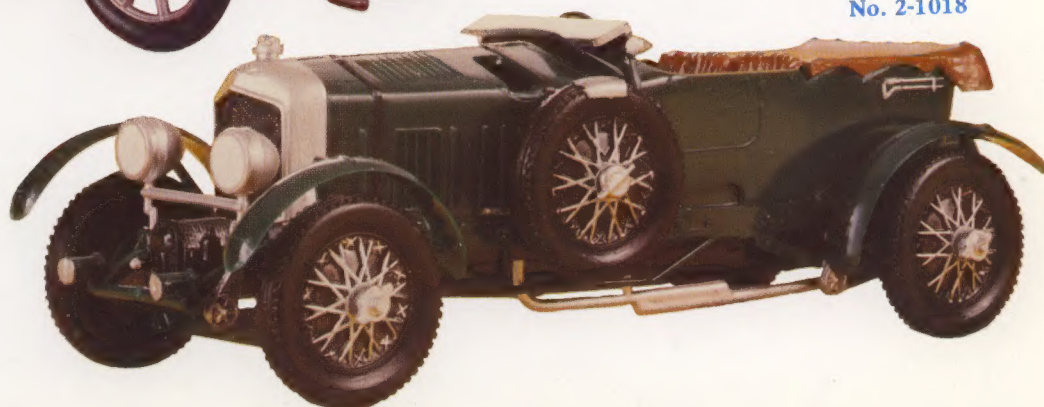

No. 2-1020

1905 ROLLS ROYCE

This striking, early example of the art of Rolls Royce cost well over \$2,000 nearly 70 years ago. The original featured a 4-cylinder 20 HP engine and pneumatic tire. Kit features superb detailing, measuring nearly 5 inches in length.

No. 2-1019

1930 4 1/2 LITRE BENTLEY

One of the most famous classics of all time. This supercharged 4½ Litre was a formidable competitor at LeMans. About 50 of these "blown 4½" racers were built. They were capable of 105 mph.

No. 2-1018

1/72 SCALE PLANES WITH CREWMEN

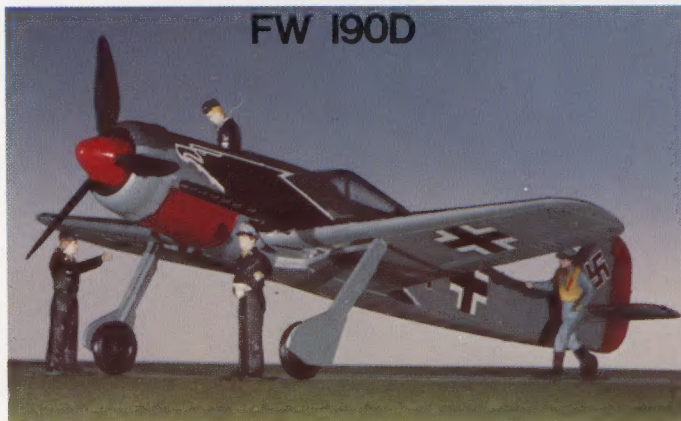

HELLCAT

The Hellcat was a rugged, carrier based fighter effective as a fighter or in a ground attack role. This kit builds either the F6F-3 or F6F-5 variants and can be built with wings folded or extended. Includes rockets and drop tank.

No. 2-0110

FW 190D

The FW 190D was developed when the airframe of the 190A, a successful fighter powered by a radial engine, was adapted to take the latest in-line liquid cooled engine to improve high altitude performance. The resulting aircraft with its longer nose and fuselage proved to be a considerable improvement.

No. 2-0112

HELLDIVER

The sturdy Helldiver was an effective dive bomber that served U.S. Navy and Marine squadrons during WW II. The MPC kit allows the building of several different variants, with folded wings and a choice of bomb and rocket loads.

No. 2-0108

ME 110

This two seater was the first attempt to produce a fighter with sufficient range to accompany bomber formations. It served extensively in Russia and the Middle East. Later it became the main German night fighter, equipped with radar and a variety of armaments.

No. 2-0111

KINGFISHER

The Kingfisher was a slow, nearly obsolete aircraft that nonetheless served with distinction in a variety of roles during WW II. The kit can be built either as a float plane or with conventional gear.

No. 2-0107

AVENGER

The Avenger was one of the most successful torpedo bombers to appear in the Second World War. It could carry a torpedo or up to 2,000 lbs. of bombs and eight 60 lb. rocket projectiles in a strike of anti submarine role.

No. 2-0109

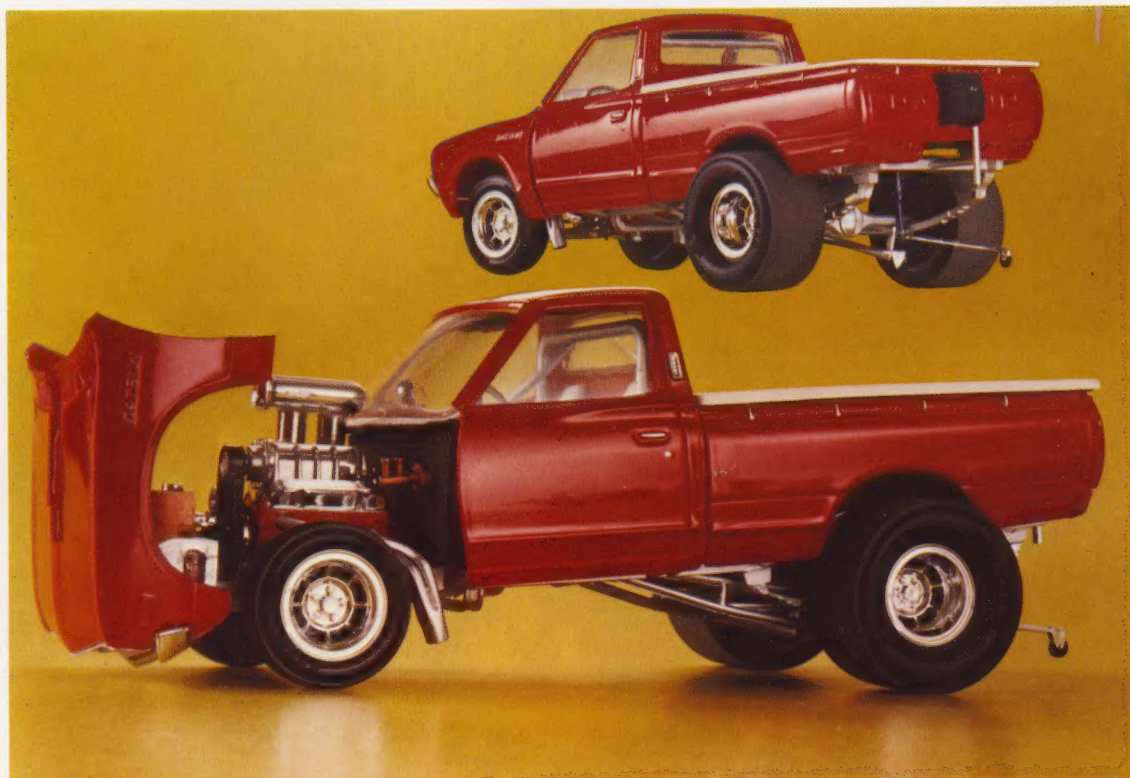

RODS AND RACERS

'LIL HUSTLER

Everybody knows Datsun pickups are hot . . . but nobody's ever seen one this hot before. Fully blown, jacked up super high and ready to rip the strips . . . and all the power goodies show when you flip up the hinged front end.

- Hinged Front End
- Blown V-8 Engine
- Hollow Drag Slicks
- Ladder-Style Traction Bars
- Super Wild Decals.

No. 1-0769

SUPER HAWK

Buick's new Sky Hawk is a gorgeous machine . . . but topped with MPC's custom, street-dominating features, it's an absolute winner! It's complete and fully detailed from the injected V-8 engine down to front and rear spoilers and side pipe.

- Rear Induction Air Scoop
- Mag Wheels
- Roll Bar
- Custom Hood

No. 1-0770

STREET BEAST '26

Here's beauty and the beast all rolled up into one wild package. A super-custom vintage truck, ready to pop the eye balls of anybody. Can be built as a van or as a pickup.

- Twin Scoops
- Twin Quad Carbs
- Wild Headers
- "C" Style Cab
- Mag Wheels
- Wide Vinyl Tires

No. 1-0771

VETTE GASSER

Bold, sleek and brawny . . . that's the Vette Gasser, a full-blown strip terror! Featuring a tilt up body that raises to display an authentic tubular chassis, blown hemi engine, roll cage and vinyl drag slicks.

- Wide Drag Slicks
- Blown Hemi Engine
- Roll Cage
- Mag Wheels
- Tubular Chassis

No. 1-0768

CHEVY STEPSIDE PICKUP

Chevy is "in"!

Trucks are "in"!

But step side pickups are
the "innest" thing of all!
And whose got the only
kit that puts it all together
for the step side fans? MPC,
naturally . . . the kit maker
that's "in". Features include
wide tires, mag wheels, side
pipes, full decals (not illustrated)
and a special bonus: a complete
1/25 scale bike that fits in
the rear.
